

The Dumb Side *of Smart Homes*

Wednesday, Oct 16, 2024

2:30 - 4:30 p.m.

In person at ADRC

300 S Adams St, Green Bay

Presented by:
Jonathan Davis,
Principal Security
Architect

“Smart” doesn’t always mean a smart choice when it comes to home technology and security. Join us for an overview of why the Internet of Things (IoT) may have more risk than reward. We will talk about ways to keep you and your loved ones safe when it comes to technology in the home.

The Internet of Things (IoT) refers to the rapidly growing network of connected objects able to collect and exchange data using embedded sensors. From Amazon Echo or Google Home to the Nest Thermostat, there are hundreds of products on the market that users can control with their voices to make their lives more connected than ever before.
